PATNER CONSTRUCTION COMPLETES MODERNIZATION OF CONCOURSE C AT WASHINGTON DULLES INTERNATIONAL AIRPORT

FAIRFAX, VIRGINIA, January 12, 2009 – Patner Construction, Inc. recently completed the enhancement of Concourse C U.S. Customs and Border Patrol (CBP) Federal Inspection Station (FIS) screening area at Washington Dulles International Airport. The end result expedites travelers processing through the FIS as well as improves international traveler's connections to other flights within the Airport.

The facility remained fully operational while servicing 4,000 international passengers daily throughout the construction process. Facility upgrades include 24 reconfigured U.S. CBP booths, overhaul and upgrade of baggage claim area, addition of more Transportation Security Administration (TSA) baggage screening machines, build out of new TSA Screening Area and the expansion of the TSA passenger screening area. Other enhancements include streamlining the passenger flow, new floors, passenger information center, ceilings, wall finishes, light fixtures, artwork and additional restrooms.
